

Tell Me About Microdermabrasion

*** What Is Microdermabrasion?**

Microdermabrasion is the newest way to rejuvenate and revitalize your skin in just an afternoon! Featured in Vogue and Allure Magazines, the microdermabrasion procedure uses a fine mist of crystals to smoothen the skin. The fine abrasive action of the crystals is coupled with a vacuum suction to remove the dead outer layer of skin bringing you new, softer skin with a more even texture to the surface. Because microdermabrasion is so precise, the procedure is virtually pain-free.

***What Can Microdermabrasion Treat?**

Microdermabrasion is ideal to treat sun-damaged skin, age spots, superficial pigmentation, fine lines and wrinkles, oily pores, blackheads and whiteheads, and acne scars. The neck and chest can also be treated to blend the skin and remove sun-damage often found in that area.

*** How Long Does the Treatment Take & How Many Treatments Will I Need?**

One of the main benefits of microdermabrasion is that the entire procedure can be done in as little as a half-hour. A complete microdermabrasion program is usually a series of treatments depending on your specific needs.

*** What Are the Benefits of Microdermabrasion?**

The procedure offers no down time, little discomfort during the procedure, no side effects, and no anesthesia or recovery time. All skin colors can be treated, and patients can immediately return to their normal activities. It is a wonderful way to achieve younger, vibrant looking skin while still keeping up with your busy lifestyle.

***Are There Any Risks?**

Microdermabrasion is one of the safest rejuvenation procedures available today. It is unusual to develop any complications from this treatment. Dr. Goldberg, and his highly trained medical estheticians will be happy to discuss with you any risks involved.

***Can Microdermabrasion Be Combined With Other Procedures?**

Yes, microdermabrasion is the perfect compliment to other procedures including Botox, Collagen, laser skin resurfacing and our new CoolTouch, Smoothbeam, and N-lite laser rejuvenation porcedures.

***How Do I Get Started?**

Dr. Goldberg and his staff would be happy to discuss your skin rejuvenation options. Please feel free to call for a private consultation.
