

Unwanted Hair Sees the Light of Day

By: David J. Goldberg

If you associate hair removal with tweezers, waxing and needles, read on. If you think hair removal involves pain, irritation, or scarring, read on. And if you believe hair removal is a temporary measure that requires endless treatments, read on for an exciting news update. Today, modern medicine offers state-of-the-art laser treatments for unwanted hair that are comfortable, safe and much longer lasting than any other hair removal method. Laser treatments have become the only efficient way to reduce large areas of hair growth such as legs, back and bikini. Lasers are also the most effective hair removal procedure available, delaying re-growth by significant periods of time. As of this year, breakthrough laser procedures have made hair removal safe for all skin types. And today's refined technology—including Lyra™ and Cool Glide™—is eliminating the problem of

PFB, or shaver bumps, caused by shaved hair that curls back into the skin. This is particularly welcome news for people with deep tans or darker complexions, who previously risked damage to pigment from more intense lasers. Typically, laser hair removal takes 15 to 20 minutes and is conducted in a series of treatments, depending on the amount and type of hair and the condition of the skin. Today's techniques have become so refined you can schedule them into your day without needing recuperation time. The results will be smooth silky skin. Hair becomes increasingly thinner, less dense, lighter in color and finer in quality. The results can be dramatic. Today there's no need for anyone to tolerate unwanted hair. Start enjoying the benefits of laser hair removal today. To schedule an appointment or for more information, call toll free: 1-800-718-5504.

David J. Goldberg, M.D. (<http://www.skinandlasers.com/>) is Chief of Laser Research at Mt. Sinai School of Medicine, Chief of Dermatologic Surgery at New Jersey Medical School and Director of Skin Laser & Surgery Specialists of New York & New Jersey. He is past President of the American Society for Laser Medicine & Surgery. Dr. Goldberg was voted "one of the top ten laser surgeons in the U.S." by Self Magazine and "one of the best doctors in America" by Woodward/White, Inc.
