DR SKIN & LASERS H I M S E L F

Talks about why he chose skin as his profession of choice - and puts a stop to the myths of all procedures that are suppose to work.

“ I LOVE MY WORK
AND MY LIFE!
DOES NOT GET
BETTER THAN
THAT! ”

We had a chance to sit down with CO₂ Lift's very own brand ambassador and New York and New Jersey's Skin Laser & Surgery Specialist Director, Dr. Goldberg. Dr. Goldberg decided to pursue a career in skincare due to the fact that it's the largest and most exposed organ of the body. He wanted to help people gain and achieve proper skincare. He believes that in order to get healthy glowing skin you must be willing to follow a strict skincare regimen. The most common mistake he says is, "People think they will see results right away and are not compliant with good quality skin care. They recognize that a lifelong regular exercise routine is required for their body, but forget that the same is needed for their skin." As for Dr. Goldberg's skincare routine, he follows a sequence of sunscreen, topical retinols, antioxidants, growth factors and most recently topical carboxytherapy with the CO₂ Lift mask.

He believes the CO₂ Lift mask is the newest innovation to be highly requested by many of his clients. In his 30 years of cosmetic dermatology practice he states, "it is rare that I see a product that is so revolutionary in its approach, safety, and efficacy." This makes his job as a brand ambassador for CO₂ Lift an easy one! Because we live in a world where injectables are common even at a young age, Dr. Goldberg promotes the option for non-invasive procedures. He believes it's never too early to start using the carboxytherapy treatment mask. Botox can be an option for adolescents who want to prevent the signs of aging early on. He will only say no to clients with unrealistic goals or who want instant results with drastic measures. Dr. Goldberg continues to advise clients on how to achieve their dream skin & feel confident. As for his future, he wants to keep doing what he loves most for as long as he can.
